The method described is based on the thick surface

(Zavodskaya Lab. 21; 7, 1955). The energy of activa-  
tion of the self-diffusion of W is greater than for other  
metals studied except Bi. (See also 60-15393)

DESCRIPTORS: \*Lead, \*Ores, \*Ultrasonics, \*Solvent extraction.

An ultrasonic field is an efficient means for accelerating the selective extraction of individual minerals during phase analysis of lead ores. Judging by preliminary experiments, the use of an ultrasonic field in phase analysis of lead ores does not necessitate modifications in the normal analytical procedure. (Author)
